Greensboro Health Disparities Collaborative

Breakout Session: Organizing for Racial Health Equity

Crystal Dixon, UNC Greensboro | Fatima Guerrab, UNC Chapel Hill

Focusing on Social Determinants of Health
Why We Joined the Greensboro Health Disparities Collaborative (GHDC)?

Check out the GHDC’s official website: http://greensborohealth.org/
Case Study #1 - Health and Healthcare

GREENSBORO HEALTH DISPARITIES COLLABORATIVE (PART 1)
Debrief on Part 1:

- How would you describe the problems the GHDC faced?

- The GHDC described the ways public health, health care, and other organizations worked together to impact the health of a community. The Collaborative introduced “systems thinking” to the medical care providers as a way to address health disparities. If someone were to ask you, “What is systems thinking?” How would you respond?
Debrief on Part 2:

• How can people other than public health “experts” contribute to health disparity research?

• What type of research approach can be used that empowers all partners?

• How can you address institutional racism through a system change in your own community, university, or medical setting?
Impact of a Recent Study Designed By the GHDC: ACCURE

*C Accountability for Cancer Care Through Undoing Racism & Equity (ACCURE)*
Closing Discussion:

• What related to you in our story (personally and/or professionally)?

• What parts of this might you be curious to see carried out in your work and/or community setting?
In Memory of Mrs. Nettie Coad:
The Driving Force Behind The GHDC
Thank You
